SECTION V: Summary Of Duties

The selectee Plans and directs the quality control management program of the AASF. Does immediate and long-range planning for all matters pertaining to quality control at the facility. Plans and establishes quality control operations and procedures for the application of Modification Work Orders (MWO) and Technical Bulletins (TBs) and assures that instructions are followed on all the aircraft supported by the installation. Answers correspondence, prepares reports and furnishes advice and assistance pertaining to quality control matters to supervisors, shop foremen, and other members of the organization. Ensures that Quality Deficiency Reports (QDRs) are initiated and forwarded when equipment fails, deficiencies are discovered in newly received equipment or equipment improvements are proposed. Serves as point of contact for the AASF in communications between the facility and the labs in the Army Oil Analysis Program (AOAP) and oversees the local aspects of the program. Inspects shop facilities, management practices, fire prevention plans, ventilation systems, lighting systems and aircraft and equipment records to assure proper shop and flight-line safety for personnel and equipment in the maintenance area of operations. Advises and makes recommendations to the Facility Commander on quality control matters. Supervises 3 to 8 subordinate workers engaged in the technical inspection and maintenance test flights of the aircraft. Accomplishes performance ratings, authorizes and approves leave requests for assigned personnel. Interviews and recommends applicants for vacant positions within area of responsibility and orientates new employees. Informs subordinates on features of personnel management and employee relations such as the appeal and grievance rights and basis for position classification actions. Exercises overall technical responsibility for the performance of subordinate workers in such endeavors as precision measuring and test equipment calibration and certification, maintenance of the technical publications library, taking samples for the AOAP, inspection of aircraft maintenance work for conformance to established quality standards, and conducting tear-down inspection to determine causes of deficiencies. Performs maintenance operational checks (MOC) and limited and general test flights of aircraft to ensure airworthiness upon completion of extensive disassembly for maintenance, repair, replacement or modification of components or aircraft systems. Performs general or limited test flights including test flights of aircraft when ground diagnostic tests cannot determine the safe and/or proper functioning of aircraft components or systems. Performs acceptance test flights of new aircraft when required. Assignments may include instruction to and evaluation of maintenance test pilots.

SECTION VI: Instructions for Applying. Applications must be emailed to HRO. The email address for HRO is: ng.ar.ararng.mbx.hro-jobs@mail.mil. E-mailed applications must be submitted in one .pdf file unless prior coordination has been made to submit the application in a different format. Evaluation will be based on the qualification requirements stated in the announcement; therefore, it is important that every requirement on the announcement be addressed on NGB Form 34-1. To be considered qualified, applicant must meet qualification requirements as of the closing date of this announcement. Whenever possible, experience should be fully explained. "YES" answers in Part IV of NGB 34-1 (except item 9) must be explained on a separate attachment. Substantial changes in duties and responsibilities during a job should be fully explained so that appropriate credit may be given.
